

INVITATION

Webinar
“Climate disclosures and your company. How to be ready”

Dear friends,

On behalf of the Chapter Zero Ukraine and Caucasus we are pleased **to invite you to participate in the webinar** “Climate disclosures and your company. How to be ready”, which will be held on **the 26 of January 2023** at 11.30 EET (09.30 GMT).

Throughout 2022, global regulators have pushed for Greater Climate Disclosure Standards and taken action to enhance and synchronize ESG reporting standards globally. Given this momentum, companies need to expect other countries and regions to follow and adopt new reporting standards as well.

With mandated climate-related disclosures fast approaching, companies should monitor proposed changes to standards so they can prepare for the future and ensure compliance with the specific reporting requirements that exist in each country of operation.

Climate change impacts companies in different ways which also vary in magnitude. The regulations' effect varies depending on a company's industry, unique environmental footprint, and how far along it is in addressing and disclosing climate indicators. Tuning into this webinar will give you an overview of regulations that come into force and business implications it brings to each sphere of operation as well as recommendations on how companies can start preparing.

Climate risk reporting will be one of the most significant corporate governance issues on board agendas in 2023, whether you are from agricultural, energy, banking or any other corporate sector. So join us to find out how your company can get ready for the new mandatory climate reporting and disclosure standards.

Please register via the [link](#). Draft agenda is attached to this invitation.

Kind regards,

Supervisory Board
